IS IT ADDICTION?
Criteria for Determining Sexual Addiction
Compiled by Laura M. Brotherson, MS, MFT

5 - Cs for Understanding Addiction

1. **C**raving -- psychological or physical
2. **C**ompulsion to use -- can't **C**ontrol it
3. **C**ontinued use (can't stop) despite adverse **C**onsequences.

Other Indicators of Sexual Addiction

- Depression related to acting out and/or sexual aversion
- History of sexual abuse, physical abuse, emotional abuse; early sexualization and sexual distortions
- Sexual behavior is defined in self-medicating terms (i.e. intoxicating, tension relief, pain reliever, sleep aid)
- Persistent pursuit of high-risk or self-destructive behavior
- Sexual arousal is higher to high-risk or self-destructive behaviors than to safe sexual behavior
- Other addictions needed in conjunction with the sexual behavior to achieve the desired effect (i.e. alcohol, substance abuse, gambling, eating disorders, compulsive spending)
- Deception around one's behavior
- Addiction present among other family members
- Extreme self-loathing due to compulsive behavior
- Having intimate relationships where sex is avoided
- Past and present crises due to sexual behavior
- Diminished pleasure for routine sexual experiences
- Comes from a "rigid" and "disengaged" family

Reference -- Dr. Patrick Carnes, *Clinical Management of Sex Addiction*, p. 12-13
Characteristics of Those with Sexual Addiction

- lonely, isolated, lacking accountability
- shame, self-loathing
- narcissism, self-focused
- repressed anger
- family of origin traumas
- co-dependent/dependent personality
- intimacy/connection disorders; marriage difficulties

Negative Core Beliefs of those with Sex/Love Addiction

1. I am a bad, unworthy person.
2. No one would love me as I am.
3. No one will meet my needs.
4. Sex (or an intense relationship) is my most important need. (It's how I feel loved and what I can always count on to comfort me and be there for me.)

Negative Consequences of Addictive Sexuality

- Dishonesty and lying
- Betraying those who love and trust you
- Neglecting and damaging family relationships and friendships
- Losing track of and wasting time
- Wasting resources of time, money, love and talents
- Sex becomes the central organizing force of life
- Ignoring/denying negative consequences to continue the behavior
- Violating personal values/beliefs despite wanting/pledging to stop

If It Isn't Sex Addiction...What is it?

- a non-addictive habit
- lack of discipline
- a non-addictive means of meeting needs
- obsessive/compulsive behavior
- ADHD induced behavior
- Bipolar induced behavior

Addiction Assessment Tools

Take the Sexual Addiction Screening Test (SAST)
  SAST - For Men / W-SAST - for Women

SAST - For Men
The Sexual Addiction Screening Test (SAST) is designed to assist in the assessment of sexually compulsive behavior which may indicate the presence of sex addiction. Developed in cooperation with hospitals, treatment programs, private therapists, and community groups, the SAST provides a profile of responses which help to discriminate between addictive and non-addictive behavior.

It is strongly encouraged that you pursue diagnosis and treatment with a trained professional. This assessment is designed to help you decide whether you should seek further help.

For Partner's
Partner Sexuality and Sex Addiction Survey. If you are or have been in a relationship with someone who has a sex addiction, you have inevitably been affected by your experience. This screening survey is part of a research study being conducted by Dr. Stefanie Carnes which aims to learn about how partners of sexual addicts are sexually affected by their relationship(s). Participating in this survey can bring you clarity about your own sexual health and provide you with a brief report about your own sexuality.

W-SAST - For Women
The Women's Sexual Addiction Screening Test (W-SAST) is designed to assist women in the assessment of compulsive sex/love addictive behavior.

Click the link below to take this brief assessment for women:
